

# MULTIMEDIA MOBILE COMMUNICATIONS

Enabler of Digital Transformation

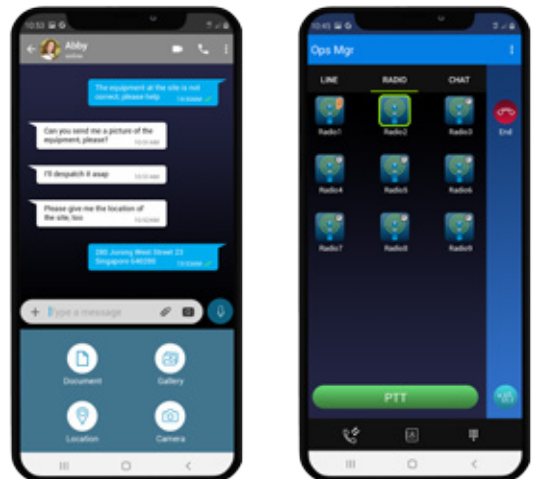

PUBLIC SAFETY & SECURITY

# Multimedia Mobile Communications

## Secure, Interoperable and Mobile

The Multimedia Mobile Communications solution provides a single secure access to multiple broadband communications services, ensuring seamless operational efficiency and enhanced incident response.

Using a mobile device, first responders or any field officers can inter-operate with other team members who are using narrowband radio communications. In addition, workgroups can be set up to facilitate fast and effective dissemination and sharing of critical information, enabling swifter response and optimised workflow management.

## Key Features and Benefits

Unify all communications' needs through a single platform

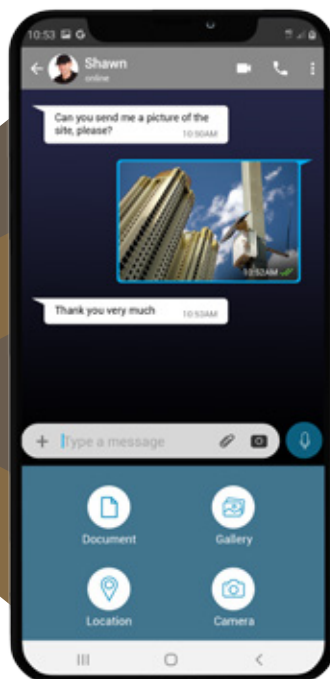

Radio interoperability

Secure and instant messaging

Share messages, files, photos, videos and locations

Video and audio conference call

Private LTE ready

User account management

- Access rights and security configuration
- Pre-defined contact list and dynamic workgroup
- Remote account management
